

Asha Vemparambil

.NET Developer

✉ ashacv17@gmail.com ☎ +61 499254910 📍 Brisbane, QLD 🌐 [linkedin.com/in/asha-prince](https://www.linkedin.com/in/asha-prince)

📅 Availability: From July 15 2026

SUMMARY

.NET Developer with 7+ years of experience designing, developing, and supporting enterprise applications using C#, .NET Core, ASP.NET MVC, Web API, SQL Server, Azure cloud services, and modern software engineering practices.

Strong experience building scalable backend services, RESTful APIs, database-driven applications, cloud-based solutions, and enterprise integrations across Energy, Utilities, and Insurance domains.

Experienced in Agile delivery environments, CI/CD pipelines, Azure DevOps, code reviews, performance optimisation, and collaborating with cross-functional teams to deliver high-quality software solutions.

SKILLS

- C#, ASP.NET, .NET Core, Web API, Blazor, SQL Server, Cosmos DB
- Entity Framework
- Fortify, WebInspect
- Legacy Application Modernisation
- React (Currently Upskilling)
- Agile/Scrum (Release Planning, Sprint Planning, Retrospectives), Waterfall
- Test Management, Test Strategy, Planning & Governance
- Software Deployment - Octopus Deployment
- HTML, CSS, AJAX, jQuery, JSON, JavaScript
- BDD/TDD, SpecFlow, NUnit
- Object-Oriented Design (OOP)
- Application Migration Projects
- Production Support
- qTest, Azure DevOps, TFS, Visual Studio, Git, GitHub, GitHub Copilot (AI-assisted development)
- Defect Lifecycle Management, Root Cause Analysis, Triage & Vendor Coordination

PROFESSIONAL EXPERIENCE

.NET Developer / Test Manager

Tata Consultancy Services (TCS) – Client: Synergy (Australia Onsite)

2025 – 2026
Western Australia

Major SAP ECC to SAP S/4HANA Transformation Program

Worked as part of a large enterprise transformation program supporting Western Australia's energy utility operations.

Key Contributions:

- Developed and supported enterprise applications using **C#, .NET technologies, SQL Server, and Azure services.**
- Designed and enhanced backend services and API integrations supporting business-critical systems.
- Collaborated with SAP functional teams, business analysts, developers, and testers to deliver transformation milestones.
- Supported integration testing between SAP S/4HANA, legacy systems, and external applications.
- Analysed business requirements and translated them into technical solutions.
- Worked with Azure DevOps for source control, backlog management, CI/CD activities, and Agile delivery.
- Performed production issue analysis, troubleshooting, and application support.
- Participated in technical discussions, solution reviews, and stakeholder meetings.

Testing & Quality Contributions:

- Managed end-to-end testing activities for SAP migration.
- Created and executed integration, regression, and automation test scenarios.
- Worked with tools including:
 - Azure DevOps
 - qTest

- TestComplete
- LoadRunner
- Redwood RunMyJobs
- webMethods

Software Developer

Tata Consultancy Services

2022 – 2025
India

- Engineered enterprise backend services for an investment data management platform using C#, ASP.NET Core, REST APIs, and Azure Cosmos DB, applying SOLID principles and layered architecture (Controller-Service-Repository) to deliver scalable financial data workflows.
- Developed and maintained RESTful APIs to retrieve, manage, and update investment data stored in Azure Cosmos DB, enabling efficient and reliable access for business users.
- Implemented business validation and override workflows, allowing investment operations users to review, modify, approve, and validate financial market data through the application.
- Developed data validation workflows that initiated downstream processing in Azure Databricks upon successful business validation.
- Collaborated with cross-functional teams including business analysts, QA, data engineering, integration teams, and offshore/onshore stakeholders to deliver enterprise application enhancements and resolve production issues.
- Utilised Azure DevOps for source control, Agile sprint management, work item tracking, code reviews, and release coordination.
- Provided production support, troubleshooting, defect resolution, and performance optimisation for business-critical enterprise applications, ensuring system reliability and operational continuity.

Software Engineer

Xerox Technology Services

2019 – 2022
India

- Developed enterprise applications using C#, ASP.NET Core, Blazor and SQL Server.
- Designed and implemented business logic, APIs, and database components.
- Created LINQ queries, stored procedures, and database models.
- Developed BDD test scenarios using SpecFlow to improve test coverage.
- Strong experience understanding existing business processes and translating them into maintainable software solutions.
- Extensive SQL Server experience including stored procedures, performance tuning, and database-driven applications.
- Proven ability to work with large codebases, debug complex issues, and deliver production-ready software.
- Improved testing efficiency and defect resolution by 15% through streamlined processes and collaboration with cross-functional teams.
- Collaborated with stakeholders to align testing strategy with business objectives, ensuring risk-based test coverage.
- Actively participated in Agile ceremonies including release planning, sprint planning, demos, and retrospectives

EDUCATION

Bachelor of Engineering, Computer Science

India

CERTIFICATES

- Microsoft Certified: Azure Fundamentals (AZ 900)
